

# Prepare to Transition to ISO 9001:2015

## When:

November 16, 2015

8:30 a.m.—12:30 p.m.

## Where:

Delaware Technical  
Community College's  
Stanton Campus

400 Stanton-Christiana Rd  
Newark, DE 19713

**Cost:** \$195

## ISO 9001:2015: About the Standard

ISO 9001 is the global benchmark for quality management and it is being revised and updated. The standard will be substantially different from the current version. The Final Draft International Standard (FDIS) has been issued and the ISO 9001:2015 standard is due to be published in September 2015. Changes between the final draft and the final published version should not be of any major consequence.

Those businesses currently registered to ISO 9001:2008 will then have 3 years to make the transition. Certifications to ISO 9001:2008 will not be valid after three years from publication of ISO 9001:2015.

Don't wait until the last minute to understand how the extensive changes impact you and how you can prepare.

## Who Should Attend:

Owners, leadership teams, managers and quality professionals

**Why Attend:** You will be prepared to ensure that your quality management system complies with the new standard.

## What Will Be Covered:

In addition to the new requirements, we will cover terminology, structure and individual topics introduced by the new standards, such as risk management, process based approach and leadership. We will discuss how to use the ISO 9001:2008 QMS to plan for the ISO 9001:2015. We will also discuss how risk management in ISO 9001:2015 may change quality management and how the changes will support integration of Quality Management with other management systems such as ISO 14001 (Environmental Management Systems), ISO 45001 (Occupational Health & Safety Management Systems), ISO 13485 (Medical Devices, ISO 22000 (Food Safety) and TS 16949 (Automotive).

## What Will Result:

Attendees will be able to plan and manage the transition so that they will have a quality management system (QMS) that will be comply, add value and support success.
